

## MODEL AT09 ARTIC VERSION

Tomasetto LPG pressure reducer, model AT09, ARTIC version, is a single stage reducer for sequential injection systems, with a pre-heating stage, particularly appropriate for severe weather conditions, suitable for medium-big-sized engines (up to 180 kW).

## TECHNICAL DATA

Material	Aluminium die cast body
Weight	1.7 kg
Dimensions	120x125x100 mm
Max. inlet pressure	3 MPa
Outlet pressure	variable from 90 to 180 kPa *
Coil voltage	12 V DC
Coil power	17 W
Inlet connection	M12x1 pipe ø8 mm
Outlet connection	Fixed fitting ø12 mm
Engine power	from 90 to 120 kW, with T > -20° C
LPG Flow rate	from 25 to 50 kg/h **

\* when not connected to engine

Lower temperatures could reduce efficiency of the reducer and performances of engine; in case of permanently higher temperatures, the reducer can be used also on more powerful engines

\*\* variable according to the features of the sequential injection system
